

1963 Galaxie Quarter Bottom Rear Repair

The new 1963 Galaxie Quarter Bottom Rear is made to repair the area of the rear quarter behind the rear wheel. It goes from the wheel well opening back to the bumper and about 14 inches high from the bottom of the quarter at the front and 10 1/2 inches high at the rear. The panel is 40 inches in length.

These panels are available in both the left and right sides.
