

Shipping Policy.

Classic Sheet Metal, Inc.

We ship with UPS, FedEx and DHL. You can chose your shipping method in checkout and even get an estimated quote.

UPS and FedEx both figure shipping based on weight and dimensions whichever is higher. This makes it difficult to estimate the cost of shipping. We try to enter the dimensional weight on certain large items. For example our Quarter repairs go in a box that is 84 inches long so both ups and FedEx have a long length up charge of \$250.00. This is in addition to shipping based on zip code. For our large quarters it costs the same to ship a pair as it does for a single side so consider this when you're buying.

We also have a \$25.00 handling charge on all orders.

For international orders our site will not compute shipping so figure out what you need to order along with your Name, phone number, email address and shipping address and we will contact you with a shipping quote.

If your order is damaged during shipping please contact us asap so we can reship the damaged items at our expense. We do need you to take a picture of the damaged items so that I can initiate a claim. Please keep all packaging materials.

Return Policy.

Our return policy is we will take back any item which we mess up and ship the wrong parts at our expense. If you order the wrong parts then you will have to pay to return the parts and shipping for the correct parts.

If the parts don't fit. Then we will allow you to return for a full refund on the parts and shipping back to us as long as the parts are in original condition and within 30 days.
